

Ethnicraft

FURNITURE

collection 2022

**We create the foundations of your
home, to inspire the stories of your life.**

For more than 25 years, we have been creating timeless furniture and accessories manufactured from quality materials. True to our values, we have maintained our goal to produce good design, distinguished by authenticity, simplicity and quality, as well as creativity and innovation.

We rely on our unique expertise to create singular designs ready to embellish your daily life durably. We create collections for every room or space: from the furniture that defines the purpose of an area, to the objects that layer it with meaning. Nothing excites us more than seeing how people love and use our products in the story of their life.

All of our designs are intentionally timeless. They withstand trends and associate well with different styles, and they can be passed on from one home to the next, carrying over the stories of one lifetime into another.

ICONS YOU MIGHT COME ACROSS IN OUR PRODUCT CATALOGUE

OILED

The items marked with this icon are finished with a natural oil. Visit pages 220-227 for more information on how to take care of our oiled furniture.

VARNISHED

The items marked with this icon are finished with varnish. Visit pages 220-227 for more information on how to take care of our varnished furniture.

BRUSHED

The items marked with this icon are brushed. This finishing gives our furniture more depth. The rougher surface highlights the grain of the wood.

CONTRACT GRADE

The items marked with this icon are EN and/or BIFMA certified.

100 %

SOLID WOOD

The items marked with this icon are 100% made out of solid wood.

FSC®

FOREST STEWARDSHIP COUNCIL®

The items marked with this icon carry the FSC® 100% label. Visit page 229 for more information on the organisation that promotes responsible management of the world's forests.

Alain van Havre

For Alain van Havre, inspiration is everything. Deeply connected to his environment and passionate about natural materials, he has developed an exceptional expertise for woodworking. Over the years, he has created his own visual language centred around form, a translation best described in collections such as the Bok, Graphic, Pl and Stairs. He believes that for someone to connect with a design, it is important to bring it closer to nature. Over the past 20 years Alain has played a pivotal role in influencing the Ethnicraft designs we know and love today.

“I’m obsessed with the freedom of movement in general, which is why I strive to escape the static in my designs and add dynamism to compositions.”

Jacques Deneef

Jacques Deneef is an Antwerp-based designer with a fascination for basic materials such as glass, wood, leather, paper and wax. After entering the world of art via his talents in oil and acrylic painting, he now focusses his time giving used objects new leases of life, alongside design development in sectors such as jewellery, lighting, textile, furniture and decoration. In offering objects a new existence, Jacques believes they are transformed into something new, they are made useful in some other way, ultimately resolving into their final destination: a work of art.

our designers

Nathan Yong

Inspired by observation of the visual environment, Nathan Yong challenges the existential questions of the objects. Instead of superfluous details, he captures the poetry of products through a stripping process. Objects lend qualities that are informed by a lightness of restraints. Based in Singapore, Nathan runs a multi-disciplinary design consultancy spanning fields such as graphic, industrial, interior and architectural design, along with strategic planning in product development, manufacturing process and branding.

"My studio allows me absolute freedom to create. I walk through the door, the world outside stops, and I am completely in my element."

Dawn Sweitzer

An overflow of creative energy and a profound interest into the world of craftsmanship is what jump-started Dawn Sweitzer's journey as an artist. Her works are expressions based on travel, enriching cultures, textures within the landscape, photography, food and fashion. There is no fixed formula to how designs are conceived, they blend ideas, they reference vintage with modern. Within her beautiful North Carolina studio, Dawn works, plays and discovers in a variety of media: paint, woven textile, mirror and glass, home accessories and decorations.

how to take care of our products

about natural materials

The beauty of natural materials lies in its peculiarities and imperfections. That is what separates true beauty from the artificial. Variations in wood grain and colour, knots, medullary rays and other natural characteristics are inherent in solid wood. These are far from flaws, but an intricate part of its character. Natural stone can also have minor pitting or surface fissures. We believe that these imperfections contribute to the charm of Ethnicraft products.

Wood, like any other natural and porous material, continues to absorb and release humidity throughout its life. Although Ethnicraft designs furniture that adapts well to the hydrometric conditions of its environment, some cracking or movement may occur. Please do not be alarmed, this is a normal response to the furniture's environment.

TIMELESS DESIGN

All our designs are intentionally timeless. They withstand trends and associate well with different styles, and they can be passed on from one home to the next, carrying over the stories of one lifetime into another. Our collections go back to the essence of what we believe is good design: pieces full of character, made from quality materials that age beautifully.

DEVOTION

We create collections for every room of the house: from the furniture that defines the purpose of a space to the objects that layer it with meaning. Nothing excites us more than seeing how people love and use our products in the story of their life.

**We create the foundations
of your home, to inspire
the stories of your life.**

CRAFTSMANSHIP

Outstanding craftsmanship is at the core of our brand, and behind the simplicity of our pieces lies a constant drive for innovation.

Incorporating advanced techniques to our process of creation, each new design is revised and reworked to the last detail: every curve, texture and line reflects our design values.

general tips & tricks

- Recommended humidity in the room for interior products: between 40% and 60%.
- Ideal room temperature: 21°C/70°F during the day, not below 14°C/57°F at night.
- To prevent colour differences, do not place furniture or accessories in direct sunlight, move objects placed on the furniture from time to time and open extendable tables on a regular basis.
- Avoid exposure to extreme conditions: do not place furniture or accessories near heating sources or air-conditioned spaces.
- To prevent staining, we recommend that any spills are removed immediately.
- When cleaning the surface, always work in the direction of the wood grain.
- Use place mats and/or coasters to prevent hot pots and pans, or cold glasses and bottles, from damaging items.
- Do not drag the furniture along the floor, always lift the furniture when moving.
- Always ensure water and solutions used to clean the floor do not come into contact with the furniture's base, as it might leave permanent marks.
- Indoor products are not intended for outdoor use. An outdoor product will always indicate so in its name.
- Last but not least, we always recommend to carefully read the care instructions specific to your item.

how to take care of our products

all hard surfaces & materials

REGULAR CARE

For dusting, use a dry cloth. For cleaning or in case of a spill, use a damp cloth and natural soap. Wipe in the direction of the grain. Do not use soap containing detergent or other chemicals. Dry with a soft clean cloth to prevent spotting.

It is always recommended to protect any surfaces with coasters, mousepads, or placemats. Repetitive daily use or heat can damage the finish.

Always move objects such as flowerpots, vases etc from time to time. Ensure any excess water or dampness is wiped dry immediately to prevent marking the surface

varnished wooden furniture

Our varnished wooden items are finished with a protective varnish. This finish gives the item its desired colour and offers a good protection against stains, even though with this extensive treatment, spills should be removed immediately.

teak furniture

TEAK NATURAL

Our natural teak range comes without any finish or protective treatment. The wood is merely polished, allowing the natural oils to rise to the surface. The high density of teak wood has the advantage that stains do not penetrate the wood as easily. Even with these characteristics, spills should be removed immediately.

PREVENTIVE TREATMENT

For extra protection from the outset, a protective coating can be applied. We recommend *Occultio Oil (9911)*. This will seal the pores of the timber and create a natural protection. Stains and marks should still be removed immediately.

THOROUGH CARE

To remove stubborn stains or superficial scratches, extra fine sandpaper can be used. Always sand in the direction of the woodgrain.

TEAK VARNISHED & WAXED

The carved parts of our Tabwa collection are varnished and, to achieve its signature shine, a wax is applied. This finish gives the desired colour and offers protection against stains. Even with this extensive treatment, spills should be removed immediately.

REFRESHING THE SURFACE

Dust the surface first. Apply dark brown liquid beeswax using a soft cloth or furniture brush. Allow the beeswax to dry. Buff with a clean soft cloth and/or furniture brush. Repeat until desired level of shine is reached.

TEAK OUTDOOR

Our outdoor collection is designed to adapt well to a range of weather conditions. As the furniture adapts to its environment, it is normal for some cracking and movement to occur.

The beauty of teak is that, even when left in its natural state, outdoors and in any season, it is basically maintenance-free. Our teak outdoor range comes without any finish or protective treatment. The wood is merely polished, allowing the natural oils to rise to the surface.

Overtime, it is normal for untreated teak to grey slightly due to prolonged sun and rain exposure. This colour change is purely superficial and does not impact the strength or quality of the timber.

REGULAR CARE

Teak's high density has the advantage that stains do not penetrate the wood as easily. Even with these characteristics, any spills should still be removed immediately.

Avoid letting rain water rest on any furniture surfaces for periods of time as permanent water damage can occur on wood, fabric or metal.

After any cleaning, ensure furniture is dried thoroughly as the spores that result in mould growth thrive in prolonged damp and dirty conditions.

With teak's natural oils rising to the surface, it can appear as irregular colouring or like a watermark. This is not a flaw, but a natural part of the timber's maturing. Use a damp cloth and natural soap to clean.

Avoid close exposure to heating sources such as outdoor fires, braziers and heaters.

Always ensure solutions used to clean paving, patios or terraces do not come into contact with the furniture, as it might leave permanent marks.

All outdoor items are equipped with glides to prevent water absorption from the ground. As well as preserving the furniture's feet, glides protect ground surfaces from scratches.

Important note about sofas: To prevent warping, before using a 5 or 6 leg sofa, adjust the glides of the middle legs to be level with the ground surface. For stability, middle legs need to be slightly shorter.

THOROUGH CARE

To keep Ethnicraft outdoor furniture in optimal condition we suggest fitting a custom rain cover during seasons where it is not in use or periods of bad weather.

Ensure furniture is thoroughly clean and dry before applying the cover protection. For long periods of time we recommend that, if possible, any soft furnishings, cushions etc should be removed and stored indoors.

To remove stubborn stains or superficial scratches to teak surfaces, extra fine sandpaper can be gently used. Always sand in the direction of the wood grain.

how to take care of our products

oak furniture

OAK OILED

Our oiled oak furniture is finished with a pigmented hardwax oil. This retains the wood's natural colour and has the advantage that stains do not penetrate the wood as easily. However, this is no fool proof guarantee against stains. In case of a spill, remove it immediately.

REFRESHING THE SURFACE

To refresh or remove superficial stains we recommend *Osmo Liquid Wax Cleaner (3029)*. This product cleans and regenerates the character of the wood and slightly reinforces the original protective coating. *Osmo Liquid Wax Cleaner* is no guarantee against stains.

THOROUGH CARE

The original hardwax coating may need to be renewed over time. We recommend using *Osmo Hardwax Oil, Natural (3041)*. In case of discolouration, stubborn stains or to remove a superficial scratch, we advise sanding the entire surface first. Make sure the surface is clean and dry before applying the *Hardwax Oil*. Spread evenly over the surface and remove any excess product to avoid spots after drying.

marble furniture

Marble is a natural product, so it needs to be treated with care. Ethnicraft marble furniture is finished with an oil protection. This is a transparent layer that does not affect the look of the polished marble.

However, it is important to know that direct contact with abrasive/high acidity products, even natural (lemons, wine, ...), should be avoided. We strongly recommend the use of coasters to prevent cold glasses and bottles from leaving marks on the furniture. Due to the porous nature of marble, remove spills immediately as this could cause permanent stains.

THOROUGH CARE

In the case of any unexpected dried spills or marks we recommend using a high quality cleaner specified for natural stone surfaces. For stubborn stains and traces, we recommend lightly rubbing with fine steel wool in a circular motion.

minerals collection

Tabletops are varnished with a water-based finish to repel common substances and fluids such as coffee, tea and wine. However, this protective coat is no fool proof guarantee against stains. In case of a spill, remove it immediately.

metal structures

We advise the following:

- Dust regularly using a soft dry cloth.
- For a more thorough cleaning, use mild soap and warm water. Rinse with clean water and wipe dry.
- Do not use steel wool, sandpaper, mineral acid, bleach or chlorine cleaners on metal surfaces.
- Do not drag the furniture along the floor, as it might damage the protective coating, cause rusting or leave permanent marks on the floor.
- Always lift the furniture when moving them from place to place.
- Always ensure water and solutions do not come into contact with the furniture's base and the wooden floor, as it might leave permanent marks on the floor. Some wood species, such as oak, contain tannin, which causes the wood to react with metal and leave permanent stains.

Due to the handcrafted nature of our products, each item will vary slightly. We consider this a sign of uniqueness and quality.

how to take care of our products

upholstered furniture

FABRICS

Upholstered items should not be washed unless clearly indicated on the care label attached to the item. Taking off the cushion covers and washing these in a machine (even at a low temperature) might lighten the colour and shrink the fabric.

If pilling should occur, don't be alarmed. It's a result of excess fibre coming off the fabric or from external sources. This is not a defect but a characteristic of many upholstered fabrics.

To keep upholstery in optimal condition we recommend the following:

- To remove pilling, we recommend using an antipilling machine.
- Avoid placing item in direct sunlight.
- For dusting or removing crumbs take a clean cloth or soft brush and wipe down upholstery. Do not rub.
- We do not recommend vacuuming. If you do so, use the lowest suction and a soft upholstery attachment.
- Treat spills immediately. Blot up as much of the spill as possible with a clean, dry, white cloth. Do not rub.
- In case of a stain, use a clean, slightly damp white cloth, blotting from the outer edge to the centre of the stain.
- Do not use any chemical products on your upholstery.
- If in doubt, always refer to the care label specific to your item.

LEATHER

The upholstery of our leather chairs and sofas should not be washed or dry-cleaned. Many of the hides used are left in their purest form. This means there is little or no surface treatment, allowing for the unique natural beauty of each hide to come through.

To keep the leather in optimal condition we recommend the following:

- To avoid discolouration do not place the sofa in direct sunlight.
- Frequently wipe the leather sofa down with a clean, dry cloth.
- Treat spills immediately. Blot up as much of the spill as possible with a clean, dry, white cloth. Do not rub.
- In case of a stain, use a clean, slightly damp white cloth, blotting from the outer edge to the centre of the stain. Do not use any chemical products not designed for leather.
- Use a towel to evenly dry the leather. Do not use a hairdryer for this purpose as it is likely to dehydrate the leather.
- Apply leather conditioner when the leather feels dry.

outdoor upholstery & fabrics

Woven in Belgium, our outdoor fabrics are 100% polypropylene, an all-weather material that is water-repellent and stain-resistant, as well as resistant to mould, moths and bacteria.

It is also:

- UV resistant.
- Resistant to the action of acids and alkalis.
- Hypoallergenic, with anti-odorant properties.
- Resistant to humidity and, although not completely waterproof, it does not absorb water and is quick-drying.
- Maintenance friendly - easily cleaned with clear water and a natural soap. Covers are machine washable up to 40°C/104°F. Never use any chemical products not designed for polyester.
- 100% recyclable.

CUSHIONS

All sit cushions are equipped with an anti-slip fabric on the bottom to ensure cushions remain in the correct position.

Cushions are filled with a long lasting, quick dry foam.

This is designed to dry quickly after exposure to rain, ocean spray, melting snow, morning dew, or moisture and humidity which can penetrate even a "water repellent" outer shell over a period of time.

The naturally occurring surface oil in teak can cause stains on cushions. To clean, use a damp white cloth, natural soap and clear water. Please note, natural oil transfer from wood to fabric is a recurring process that cannot be prevented.

RAINCOVERS

Custom-made to fit Etnnicraft outdoor furniture and upholstery, our raincovers provide excellent protection against water, wind and frost.

Shielding against dust, dirt, UV and harsh weather conditions, covers are breathable to prevent mould and mildew growth. Covers also feature metal eyelets for fastening against high winds.

Produced in Europe and handmade using a PU-coated textile specifically developed to protect quality wooden furniture, raincovers provide a gentle shield to the surface it rests on. They are durable and lightweight for easy fitting.

Before fitting, ensure furniture has been cleaned off and dry. Ensure any dirt or leaves have been dusted off surfaces to reduce the chance of mould growth. Remove the cover regularly in order to let the furniture breathe, as any residue trapped on surfaces can cause mould. For covers fitted over dining tables we recommend placing a tennis ball between the cover and the table surface to enable better ventilation.

Raincovers are easy care, machine washable up to 30°C/86°F, and fold down easily for storing. Air dry only, ensure cover is completely dry before storing.

For ongoing care, we recommend cleaning any debris off the cover regularly with a cloth, brush or hose.

our commitment

Wood has always been the core material in the Ethnicraft range. We are deeply aware of the impact of our industry on the environment and we take environmental issues to heart: the origin of the wood, the energy we use in the production and distribution process, the treatment of the products and waste reduction – we try to be as environmentally friendly as possible.

In a world where trends change from one year to the next, we want to create design that will last for generations. Our timeless designs associate well with different styles, while our solid wood is strong and ages incredibly well with time. The ultimate noble and renewable material, all of our wood is sourced from responsibly and carefully managed forests.

NO WASTE

Production waste such as leftover logs, wood and sawdust are re-used for other purposes. The sawdust from logs is either used as fuel for the drying ovens or compressed as a base for pellets. All the leftovers from cutting planks to size are recycled and used as base material or as box joints for panels.

FSC® LABEL FOR OUR FURNITURE

Our commitment to the environment is reflected by the FSC® CoC (Chain of Custody) certification of our distribution centres. The FSC® label guarantees products come from forests that are managed so that they meet the social, economic, and ecological needs of present and future generations. In the case of Ethnicraft NV and Azur, the CoC certificate guarantees that the company is perfectly placed to buy, stock and sell products with a specified FSC® certificate, originating from sustainably managed forests, controlled sources and reclaimed materials, or a mixture of these.

The ultimate noble and renewable material, our wood is sourced from responsibly and carefully managed forests.

QUALITY CONTROL AND TESTING

Producing furniture and accessories at the highest quality, strength and safety is extremely important to us.

To ensure this, we test all our products throughout the entire development process. We test on factors such as stability, durability, and safety for domestic use, to a level that meets or exceeds the highest furniture standards within the industry. Our internal protocols are based on the standards set by ANSI (American National Standards Institute) and BIFMA (North American Business and Institutional Furniture Manufacturers Association).

Moreover, specific products within our collections are certified by independent external facilities in order to meet the European requirements for contract-grade use, along with specific requirements based around ecological and health regulations such as toxic substance use and flammability. Details on our testing can be found on our website and within our catalogues.

TEXTILE SOURCING AND SUSTAINABILITY

Our cushion covers, throws and rugs are crafted from the best weaving yarns which are primarily produced in Belgium, France, Italy, Peru and Pakistan.

By consciously choosing natural fibres – such as cotton, wool, and Belgian linen – we stay true to our values: design pieces full of character, made from quality materials that age beautifully.

Cushion inners are made in The Netherlands and are

Oeko-Tex 100 certified. The Oeko-Tex label is an international standard that guarantees no harmful substances are contained within the final product.

It certifies both natural and synthetic fibres. For the filling of our cushions, we have consciously opted for duck feather. As a natural product, duck feather far surpasses synthetic alternatives in terms of durability and sustainability. All cushion fillers carry the Downpass certification to guarantee high quality, ethical sourcing, and traceable supply chains.
